SIM PCMH Billing and Coding Collaborative

Overview of Upcoming Events

Purpose: To support SIM PCMH Initiative practices and POs in understanding G and CPT care management and coordination code requirements for Medicare patients, as well as care management and tracking codes for Medicaid patients.   The collaborative will:

- Support participants in Billing/Coding related issues for Care Management (CM) / Care Coordination (CC)
- Build an understanding of CM/CC code requirements

Collaborative Structure and Facilitation: The collaborative is structured to offer two types of engagement opportunities: 1) topic-focused webinars and 2) Q&A hours. Topic-focused webinars will bring in national experts where appropriate, and participating payer partners including the Medical Services Administration. Q&A hours offer an opportunity for participants to ask questions and discuss their challenges for joint solution finding.

Participation: Billers, coders, practice managers, PO representatives, and interested care managers and coordinators, as well as other pertinent team members within practices and POs.

Practice Learning Credits: One hour of SIM PCMH Practice Learning Credit will be earned per each hour of participation in the collaborative, up to 4 hours total.   Participants must register with their complete information and sign in to webinar and Q/A hour sessions with the same information to earn credit for their practice.   Anonymous participants will not earn Learning Credits for their practices. Though the sessions will be recorded on the SIM PCMH Care Delivery website for later viewing, to obtain Practice Learning Credit, participants must join sessions "live" (in real-time).

Schedule and Registration: The format of the sessions, broadly, is to offer a monthly expert-led webinar followed a week later by an open Q/A session on the topic of the webinar. Practices and POs can submit questions in advance for the webinar and/or Q/A session via the registration link. Any changes to the schedule will be communicated in advance. The May-July 2017 sessions focus on three topics: 1) the Transitional Care Management (TCM) codes; 2) the Chronic Care Management (CCM) and Complex Chronic Care Management (CCCM) codes; and 3) dealing with the patient financial liability (generally a 20% cost share) that CMS requires for Medicare FFS patients. There will be three subsequent topics offered August-October on subjects that collaborative participants select.

SIM PCMH Billing and Coding Collaborative Series
All Sessions Take Place From: 11:30 AM -1:00 PM ET

Date	Engagement Opportunity Type		Topic	Registration	Other Information
	Topic-Focused Webinar	Q&A Hour
